Title : Oracle Policy Automation
Cloud Service 2017
Implementation Essentials

Vendor : Oracle

Version : DEMO

NO.1 Consider the following excerpt from source material for a building permit:

"The City believes that the beauty of its lands is important. Any owner of an existing building that exceeds three stories within city limits must pay an additional yearly fee. The fee is \$100 for every story in excess of 3."

A rule concludes: An owner must pay an additional fee yearly fee if _____.

Which three options complete the conditions for this rule based on the requirements?

- A. the building is an existing building
- B. the building is located within city limits
- C. the fee = (the number of building stories - 3)*100
- D. the number of building stories > 3
- E. the city believes the beauty of its lands is important

Answer: A,B,D

NO.2 Which example of a single Boolean attribute text uses a conjunction (and) correctly?

- A. the person is hot and the person is in the sun
- B. the person satisfied either eligibility criteria
- C. the person drank the coffee and the person ate the cake
- D. the person's favorite color combination is blue and yellow
- E. the person satisfied both eligibility criteria

Answer: C

NO.3 The source material for your policy model says:

To be eligible for the program, there must be at least one child in the family under 18 years of age. The payment amount for the family is based on the total income of all family members. If a family member has multiple jobs, include income from all jobs.

Which two steps should you perform?

- A. Create two entities: the family member, the family member's age.
- B. Use an entity function to calculate a family member's total income from all their jobs.
- C. Create three attributes (the first job, the second job, the third job) to allow for family members with multiple jobs.
- D. Create three entities: the family member, the family member's age, the family member's job.
- E. Create two entities: the family member, the family member's job.
- F. Create an interred entity for "the job" to allow for family members with multiple jobs.

Answer: A,C

NO.4 Your policy model has two entities: the applicant (Global) and the applicant's income.

What type of relationship does the text "the applicant's primary income" describe?

- A. many-to-many
- B. one-to-one
- C. many-to-one
- D. self-referential one-to-one
- E. one-to-many

Answer: B

NO.5 A student admissions system must capture multiple study preferences for a prospective student. Each preference includes a preferred campus. If the student is electing to study at the Sydney campus, then the student should be asked accommodation questions.

Which condition should you use to conclude that "the student should be asked the accommodation questions"?

- A. ValueAt (the preferences, the preference's campus = "Sydney")
- B. InstanceCount (the preferences, the preference's campus) = "Sydney"
- C. InstanceEquals (the preferences, the preference's campus) = "Sydney"
- D. Exists (the preferences, the preference's campus) = "Sydney"
- E. Exists (the preferences, the preference's campus = "Sydney")

Answer: B

NO.6 Which three statements about checkpoints are correct?

- A. Interviews must have at least one checkpoint.
- B. Interviews can have checkpoints after every screen.
- C. Checkpoints can be configured for web interviews, but not Policy Automation Mobile interviews.
- D. Checkpoints can be configured for Service Cloud connections, but not for other web service connections.
- E. Interviews can have checkpoints after hosen screens.
- F. A data connection is required to configure checkpoints for an interview.

Answer: A,D,F

NO.7 Which two operators must you use in a procedural rule to enforce collection of all entity-level data for all entity instances?

- A. For
- B. ExistsScope
- C. Exists
- D. ForAll
- E. InstanceCount
- F. Known

Answer: C,F

NO.8 Which two options require custom development with the OPA Mobile SDK?

- A. synchronizing data collected in OPA Mobile with a custom back-end system
- B. running OPA Mobile on Android devices
- C. adding an upload control to a OPA Mobile interview screen
- D. incorporating OPA Mobile interviews into composite mobile applications
- E. running OPA Mobile interviews while offline

Answer: A,D
