Wonderful Certification Exam Guide and Exam Dumps- PassLeaderVCE

Exam : **E20-593**

Title : Backup and Recovery
Implementation Exam

Vendor : EMC

Version : DEMO

NO.1 A EMC NetWorker administrator needs to provide customizable backup reporting, alerting, monitoring, and correlation analysis capabilities across an entire backup environment. Which EMC application should the backup administrator use?

- A. EMC Data Protection Advisor
- B. EMC NetWorker Management Console
- C. EMC HomeBase
- D. EMC Avamar

Answer: A

NO.2 After creating an EMC NetWorker advanced file type device, you notice that the corresponding read-only device is missing. What is a possible cause?

- A. Device is not labeled.
- B. Device is not enabled.
- C. DiskBackup Option Enabler is missing.
- D. No backups have been performed.

Answer: A

NO.3 Which Dell EMC NetWorker database allows an administrator to browse backup details for a particular point in time?

- A. Media database
- B. Resource database
- C. Jobs database
- D. Client File Index

Answer: D

NO.4 An administrator is backing up a Windows 2008 R2 system using save set ALL with EMC NetWorker version 7.6.2.

The administrator notices that no VSS save sets are backed up. What can be done to back up the VSS save sets?

- A. Specify VSS:DISASTER_RECOVERY=off
- B. Reinstall the client software
- C. Check the VSS service on the client
- D. Recreate the client resource

Answer: A

NO.5 An EMC NetWorker Administrator needs to be able to back up and recover a high density active file system to the backup devices connected to local or remote storage nodes.

- A. Add the SnapImage module
- B. Add the NDMP module
- C. Add the PowerSnap module
- D. Add EMC NetWorker Module for Microsoft Applications

Answer: A

NO.6 A Dell EMC NetWorker backup administrator is trying to restore Client A from Client B in the same datazone.

After clicking the "Recover" option using NetWorker User for Windows, the administrator is not able to see Client A in the source window.

What is the reason for this issue?

- A. Administrator user must perform the recovery
- B. Remote access field of Client A is not populated
- C. Remote access field of Client B is not populated
- D. This type of recovery is not supported

Answer: C

NO.7 In an EMC NetWorker environment, you have been asked to create a custom command using "save" for the testing of new clients from the command line.

Where must this custom command reside on the server?

- A. <install dir>\Program Files\Legato\nsr\bin
- B. <install dir>\Program Files\Legato\nsr\res\nsrdb
- C. <install dir>\Program Files\Legato\nsr
- D. <install dir>\Program Files\Legato\nsr\res

Answer: A

NO.8 In an EMC NetWorker environment, you are required to keep media in drives for only 10 minutes after completion of backup. What parameter must be set?

- A. Operation timeout
- B. Unload sleep
- C. Idle device timeout
- D. Withdraw timeout

Answer: C

NO.9 What does an EMC NetWorker directive do?

- A. Directs the save set to a specific pool
- B. Omits specified files from a file system backup
- C. Specifies a file system to back up
- D. Specifies the storage node to use for the backup

Answer: D

NO.10 What is a characteristic of the EMC NetWorker SnapImage module?

- A. Block-level backups of dense file systems
- B. Fast block-level backups of a file system mounted on a proxy server
- C. Immediate recovery of a file system from a persistent snapshot
- D. SAN-based image-level backup and recovery of file systems

Answer: A

NO.11 What is a recommendation to make more space available when the file system containing an AFTD becomes full?

- A. Stage older save sets to another volume
- B. Configure AFTD to continue backups automatically on another volume
- C. Manually clone the largest save sets to another volume
- D. Change the device to a file type device

Answer: A

NO.12 What is the command to start all of the EMC NetWorker processes on a UNIX server?

- A. networker start

- B. ./networker
- C. networker-start
- D. /proc/networker

Answer: A

NO.13 In an EMC NetWorker storage node with four stand-alone LTO tape drives, which daemons must be running?

- A. One nsrmmd and four nsrlcpd
- B. Four nsrmmd only
- C. Four nsrmmd and one nsrlcpd
- D. Four nsrlcpd only

Answer: B

NO.14 What is a characteristic of VCB backups in EMC NetWorker?

- A. Requires a NetWorker client on each virtual machine
- B. Requires a storage node on the VCB backup proxy
- C. Supports image and file-based backups
- D. Does not support LAN-free backup

Answer: C

NO.15 In which order are the steps performed when creating an EMC NetWorker application- based snapshot?

- A. 1. Freeze application2. Flush buffers3. Take snapshot4. Thaw application
- B. 1. Flush buffers2. Freeze application3. Take snapshot4. Thaw application
- C. 1. Freeze application2. Take snapshot3. Commit writes4. Thaw application
- D. 1. Commit writes2. Freeze application3. Take snapshot4. Thaw application

Answer: A

NO.16 A site is using EMC NetWorker with EMC NetWorker Module for Databases and Applications for backups. The administrator wants to eliminate redundant backup data to significantly reduce backup storage requirements. Which component would you recommend adding to the backup environment?

- A. Data Domain
- B. PowerSnap
- C. SnapImage
- D. SnapView

Answer: A
