Wonderful Certification Exam Guide and Exam Dumps- PassLeaderVCE

Exam : **NCP-5.15**

Title : **Nutanix Certified Professional
- Multi cloud Infrastructure**

Vendor : **Nutanix**

Version : **DEMO**

NO.1 How should an administrator correct an SSL error when connecting to a Nutanix cluster?

- A. Add the SSL certificate to the workstation's trusted people store
- B. Add the SSL certificate to an AD group policy applied to all computer objects
- C. Create a new SSL certificate for the cluster signed by an AD certificate authority
- D. Create a new self-signed certificate for the cluster with a 4096 bit key

Answer: C

NO.2 through what interfaces is/are (anti-)affinity rules configured. (Choose three)

- A. anti-affinity :prism
- B. anti-affinity :cli
- C. affinity :cli
- D. affinity :prism

Answer: B,C,D

NO.3 An administrator is commissioning a Nutanix Enterprise Cloud. Once the user VMs have been deployed and are running, the administrator finds that VMs on the same host are able to communicate, but are unable to communicate between hosts.

What must be changed to enable full inter-VM communications?

- A. The VMs need to have static IP addresses.
- B. Change the spanning-tree port type on the switch.
- C. Update the switch to specifically allow VLAN 15
- D. Change the network the VMs are connected to

Answer: C

NO.4 Which CVM service is primary responsible for handling all metadata operation with a Nutanix cluster?

- A. Cassandra
- B. Stargate
- C. Zeus
- D. Genesis

Answer: A

NO.5 In a Nutanix Cluster, I/Os are served by the host where the VM is running Which Nutanix feature does this describe?

- A. Distributed Storage Fabric
- B. Distributed File System
- C. Data Locality
- D. Data Resiliency

Answer: A

NO.6 What provides the most efficient method to delete 20 specific AHV VMs?

- A. In Prism Element, select and delete each VM.
- B. Create a script using Postman and REST API.

- C. In Prisma Central, select all VMs and click delete.
- D. Create a script using PowerCLI to delete the VMs.

Answer: C

NO.7 An administrator has a 4-node cluster that cannot experience any downtime. The cluster has 10 TB of total space. Approximately 5 TB of space is currently utilized.

How many nodes can the administrator take offline without impacting workloads on the cluster?

- A. 1
- B. 3
- C. 0
- D. 2

Answer: A

NO.8 What is default behavior for VM High Availability for Nutanix AHV?

- A. VMs restart on other hosts as available resource allow
- B. Only VMs with High Availability explicitly enabled will restart
- C. No VMs restart because HA is not enabled by default
- D. All VMs restart because system reservation are already made

Answer: A

NO.9 An administrator wants to create a trunked interface on a VM on AOS 5.15x.

Which two steps should the administrator take first to achieve this? (Choose two)

- A. Update VM dialog.
- B. SSH to CVM.
- C. Use acli
- D. Log in over PE web UI.

Answer: B,C

NO.10 Which Nutanix feature allows for a Less than 60 minutes RPO and leverages light weight snapshots (LWS)?

- A. Near Sync
- B. Nutanix Guest tools
- C. Volume Group
- D. Cloud Connect

Answer: A

NO.11 A two-node ROBO cluster is configured with a witness VM.

What happens when Node A goes down?

- A. All operations and services on the Node B are shut down and go into a waiting state.
- B. The cluster is unaffected and no administrator intervention is required.
- C. The- cluster becomes unavailable and goes into read-only mode.
- D. Node B sends a leadership request to the Witness VM and goes into single-node mode.

Answer: D

NO.12 The Stargate service becomes unavailable on a single CVM on an AHV node. What is used to maintain I/O operations in the cluster?

- A. Route injection
- B. Hypervisor HA
- C. iSCSI redirector
- D. ha.py

Answer: C

NO.13 Which Nutanix product or feature would support the replacement of a storage appliance for shared home directories?

- A. Volumes
- B. Files
- C. Leap
- D. Storage container

Answer: B

NO.14 An administrator encounters an error in Prism. After searching through the Nutanix product documentation and knowledge Base the administrator decides to engage Nutanix Support for further assistance.

Which three items will help Nutanix Support to triage and resolve this error most efficiently? (Choose Three)

- A. NCC output

- B. Licensing Information
- C. Cluster Name
- D. Detailed Description
- E. Log Bundle

Answer: A,D,E

NO.15 Which two private key types are supported by the Nutanix SSL certificate implementation?
(Choose two.)

- A. ECDSA
- B. ED25519
- C. RSA
- D. ECDH

Answer: A,C

NO.16 An administrator is configuring data protection and DR for a multi-tier application. All VMs must be protected at the same time.

What must the administrator do to meet this requirement?

- A. Create a protection domain for each VM with identical schedules
- B. Create a consistency group for the application and place all VMs in it
- C. Create a protection domain for the application and select auto-protect related entities
- D. Create a consistency group for each VM with identical schedules

Answer: B

NO.17 For security reason an administrator needs to logically separate management and data traffic on Nutanix cluster.

Which feature should the administrator select for this configuration?

- A. Microsegmentation
- B. Network Virtualization
- C. Network Segmentation
- D. Prism Central

Answer: C

NO.18 what information is shared through pulse? multi answer

- A. metadata
- B. system alerts
- C. system level statistics
- D. identification data

Answer: B,C
